

MANUAL HIGH FREQUENCY WELDING MACHINE MW-800K

Special features

- In order to facilitate operation, two heating modes for the manual welding machine: Mode 1 is to step on the foot for a long time to heat, loosen the heating will stop; Mode 2 is to set the temperature and time on the screen, and to heat the foot automatically.
- Suitable for saw blade tooth filling, tooth change, renovation.
- Large power, fast speed, wide application range, can weld all kinds of saw blades.

Technical data:

- Diameter of saw blades: 100mm~800mm
- Rake angle: -5° ~ $+25^{\circ}$
- General power: 6.0kw
- Water pressure : ≥ 0.25 Mpa
- Electricity: 220 V (single phase) 50 Hz (wire bigger than 6mm²)
- Dimension : 900mm *500mm *1200mm
