

QL-850

AUTOMATIC BRUSHING MACHINE

TECHNICAL FEATURES:

- QL 850 Automatic brush machine is a special equipment designed for welding spots on circular saw blades.
- It can be used to polish and cover welding spots by rotating grinding the welding position of saw blades through the installed steel wheel. Its high efficiency, good brush effect, clean and bright.
- The equipment is simple and easy to operate, PLC control processing data, high stability.
- Different from the traditional sandblasting process, the product is more beautiful, more environmental protection; It does not change the stress of the saw blade as easily as sandblasting.

TECHNICAL DATA:

- Diameter of saw blades: $\Phi 165\text{mm} \sim \Phi 850\text{ mm}$
- Working air pressure: 6 kg/cm^2
- Voltage: 380 V (three-phase voltage)
- Total Power: 6 Kw/h
- Ventilating ability: $>5\text{m}^3/\text{min}$
- Anti-rust liquid: Water: 1:10
