

CM-620AI

INTELLIGENT CLEANING MACHINE (WITH ROBOT)

Special features

- This fully automatic intelligent cleaning machine is specifically designed for cleaning circular saw blades. It uses a smart camera to automatically identify the center hole, eliminating the need for adjustment.
- The robotic arm can hold approximately 200 saw blades at a time, enabling automated loading and unloading, eliminating manual labor.

Technical data:

- Diameter of saw blades: 160-500mm
- Power: 24KW
- Air pressure: $\geq 0.50\text{Mpa}$
- Electricity : "220V(single phase)
50 Hz (wire bigger than 4mm^2)"
- 8 hours work efficiency: 2000-2500 pcs
- Number of saw blades placed by robot arm:
200pcs thickness 2.0mm saw blade
- Dimension: 3000*1280*2000mm
- N.W.: 1000KG
